(Copyright © 2007 by Sierra Research, Inc. All Rights Reserved)

A Comprehensive Electronic Database of Vehicle Emissions and OBDII Test Parameters for Model Years 1973-2007

General Information -- Under contract to the U.S. Environmental Protection Agency (EPA), Sierra Research developed both the original I/M Lookup Table and annual updates to the table until EPA discontinued funding of publicly available updates in 2000. Since that time, Sierra has developed, copyrighted and licensed the use of additional proprietary updates to interested parties. The Sierra Research I/M Lookup Table is the only available electronic database of vehicle emissions and OBDII test parameters for the full range of model year 1973 and newer in-use motor vehicles. Most United States vehicle emissions inspection programs use it to ensure consistent and proper testing of motorists' vehicles. The 2007 update includes vehicle records for up through the 2007 model year for all passenger cars and light-duty trucks certified by EPA. It also includes information on 8,500-10,000-lb GVWR gasoline-fueled vehicles certified in recent years. An optional set of OBDII diagnostic link connector (DLC) pictures is also available for a small additional cost.

Cost -- One license to use the 2007 Sierra Research I/M Lookup Table in a state I/M program..... \$15,000
OBDII DLC connector pictures, 1996 – 2005 linked to Lookup Table ID \$ 2,000
